

From these risks:

- A. Undefined responsibilities.
- B. Obsolescence.
- C. Difficulties in obtaining the bank loan.
- D. Bad estimation of the time required to complete a user story.

Select those which are:

1. Technical risks
  2. Management risks
  3. Organizational risks
  4. External risks
- 

From these measures:

- A. Doing nothing.
- B. Pair programming.
- C. Outsourcing a module because we foresee that it is difficult for us to finish it on time.
- D. Hiring new staff because we are delayed with the completion of a module.

Select those which are mainly intended for:

5. Mitigation.
6. Containment.
7. Evasion.
8. Avoidance.

In this uncertainty diagram:

Select from A to F:

9. The date on which the probability of having released is significantly higher than 50%, but lower than 100%.
  10. The date on which the probability is significantly higher than 10% and significantly lower than 50%.
- 

From these concepts:

- A. Response time.
- B. Accuracy.
- C. Fixing errors.
- D. Memory use.

Select those which are mainly associated with:

11. Usability.
12. Reliability.
13. Efficiency.
14. Maintainability.

From these tests:

- A. Simulating 500 users simultaneously browsing an online bookstore, adding items to their carts, and checking out to verify the site can sustain its performance under normal traffic conditions
- B. Incrementally increasing the number of users on a video streaming service beyond its expected limits to identify at what point the system breaks down or performance becomes unsatisfactory.
- C. Operating a financial transaction processing system under regular load non-stop for 48 hours to confirm its reliability in handling transactions consistently without failure, memory leaks, or performance degradation.

Select:

- 15.** The stress tests.
  - 16.** The load tests.
  - 17.** The static tests.
  - 18.** The functional tests.
  - 19.** The stability tests.
- 

From these aspects:

- A. Build integrity.
- B. Switch between tasks.
- C. Decide as late as possible.
- D. Finished work.

**20.** Select those which are wastes in the Lean methodology.

From these items related to configuration management:

- A. The same file is being edited by multiple people at the same time.
- B. Formally accepted version of one or more software configuration items.
- C. Recording the changes which lead to each version from the previous one.

Select those which are most closely related to:

- 21.** Baselines.
  - 22.** Configuration status accounting.
  - 23.** Concurrency management.
  - 24.** Version control.
- 

From these processes of PMBOK:

- A. Create WBS.
- B. Determine budget.
- C. Estimate activity resources.
- D. Develop schedule.
- E. Control procurements.
- F. Identify stakeholders.
- G. Estimate costs.
- H. Manage team.
- I. Implement risk responses.
- J. Collect requirements.
- K. Develop project charter.

**25.** Select those which belong to the executing process group.

**26.** Select those which belong to the Scope management area.
