

## PROYECTOS DE INGENIERÍA Y GESTIÓN DEL SOFTWARE

REPORT NUMBER	0
TEAM NUMBER	24
TITLE	FleetTrack
DATE	04/02/2025

Participating members:
Eduardo Etopa Lechuga
Francisco Javier López-Dufour Morales
Antonio Medina Santana

Description (max 300 words):

**FleetTrack** is an app to help in the management of vehicle fleets.

The owner of the fleet (first type of user) want to:

- register their vehicles (each one with specific characteristics)
- check the vehicles inspections and its history (oil and water level, tires...)
- know the location of the vehicles (when they are not in use)
- the route they are making during the service.
- general statistics about the fleet (fuel and management cost...)

Every vehicle gets a driver assigned (another type of user), who is the one doing the inspections.

Number of words: 94

---

### **Instructions:**

*Write a short description of the software application you intend to develop. Indicate the names of the team members who have participated. Convert your document into PDF format and name it R0\_XX.pdf, where XX is the identifier of your team.*
